|--dload(directory)

    |-- UPDATE.APP (file)

2   SD-card Upgrade Process

2. 1   Notes:

1)   Before SD-card upgrade，please backup your data.

2)   Make sure your tablet has more than 20% power.

3)   Make sure the SD-card has enough space (more than 4G) for copying upgrade file, and the format is FAT32 or NTFS.

4)   Before finish upgrading, do not remove SD-card.

5)   Do not power off when upgrading.

2. 2   Process

1)   Please copy dload directory(including UPDATE.APP and update_vendor.app) to the root directory of SD-card or inner sdcard.

2)   Click Settings and select Update
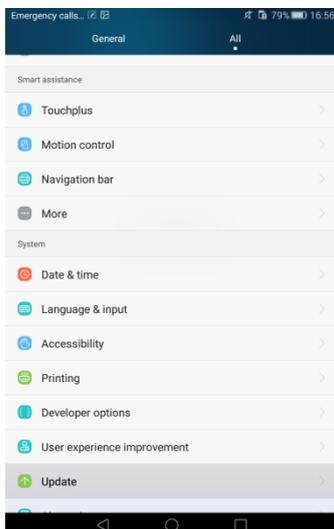

3)   Select Menu

4)   Select Local update
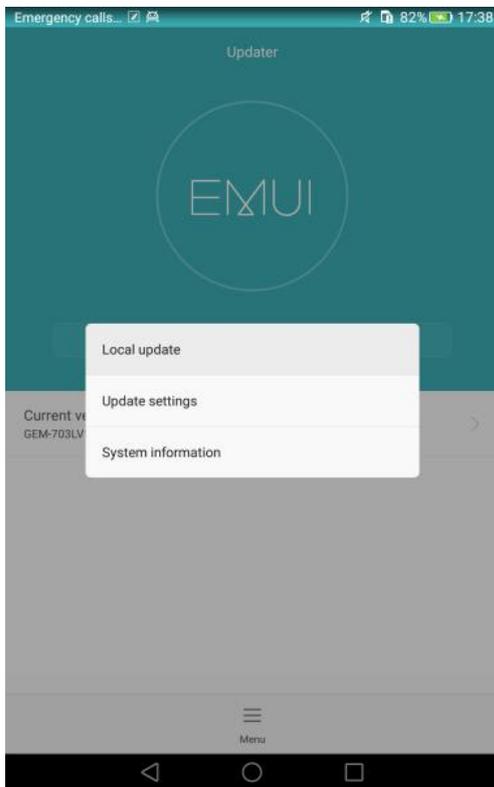

5)   If the package is copied to inner sdcard, it shows as follows:
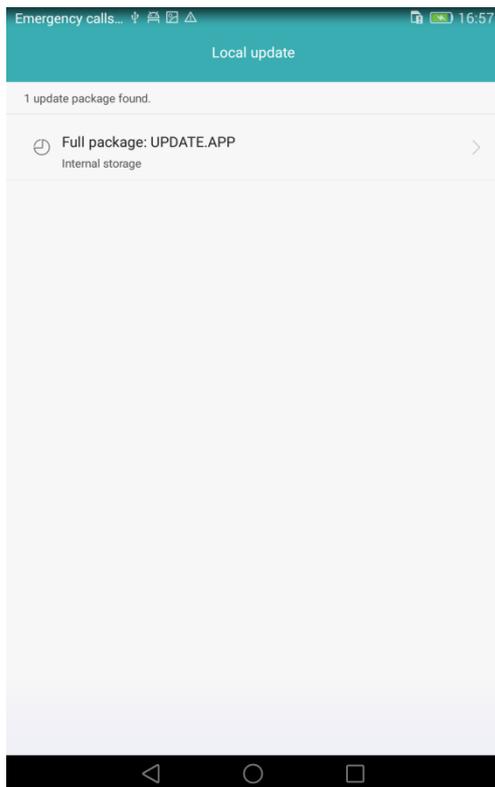

If the package is copied to external sdcard, it shows as follows:
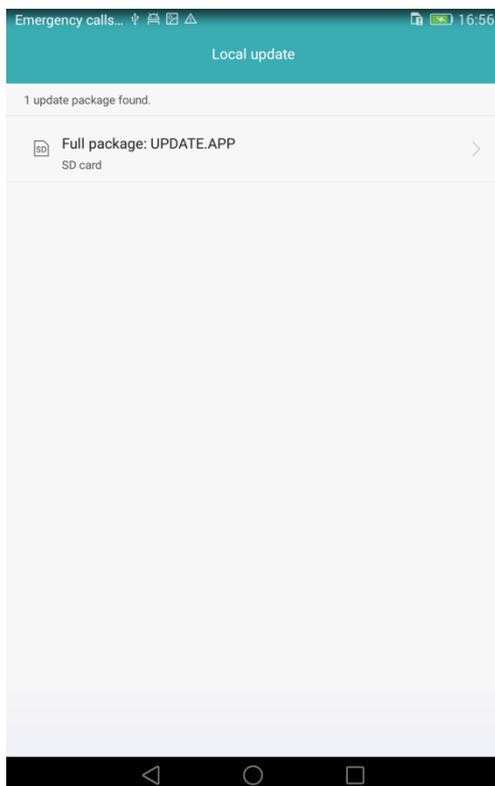

6) Select "Full Package: UPDATE.APP".
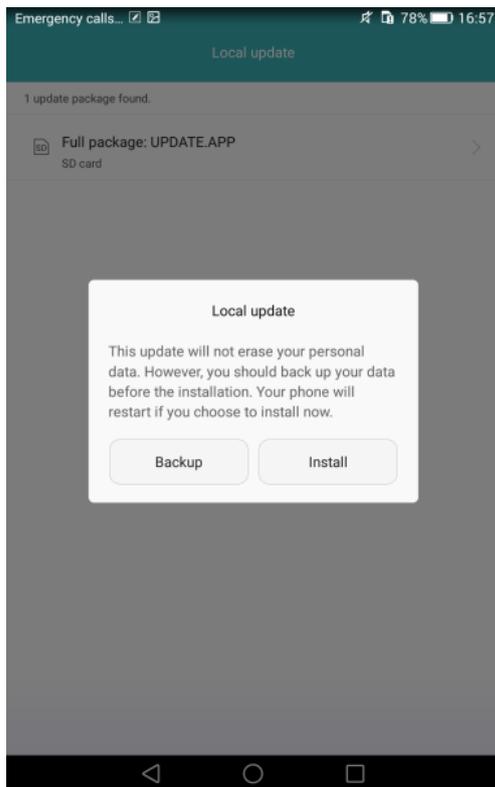

7) Select Install to start sdcard upgrade and reboot to recovery to do upgrade. The screen will

display as follow during normal upgrade process:
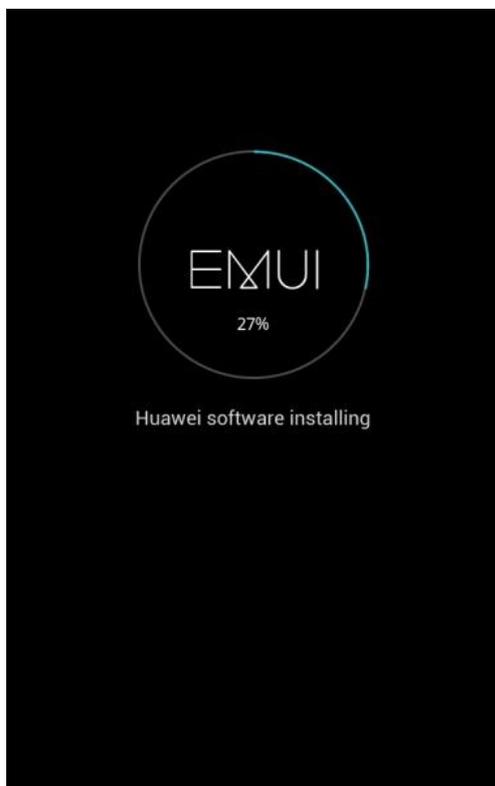

8) If the upgrade succeeds, the phone will reboot. If update failed, the screen show as

follows:
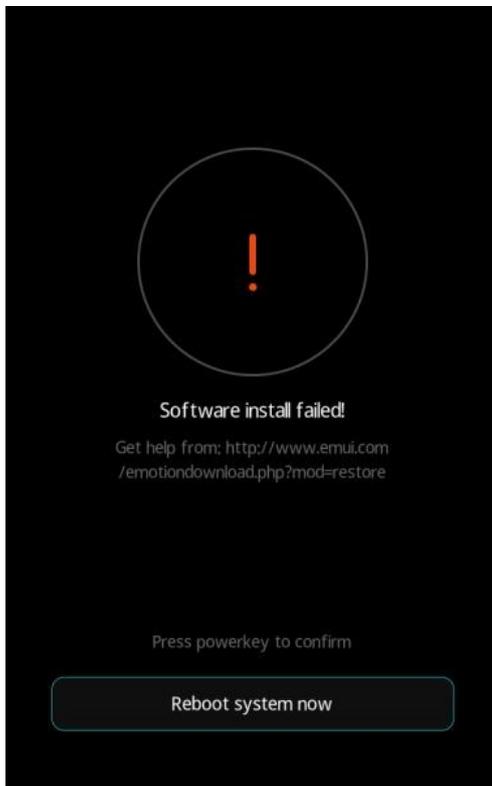

NOTICE: If upgrade failed, please check whether the upgrade file is intactness or not, or

UPDATE.APP and update_vendor.app is correctly put in SD-card or not.
