1 Upgrade instruction

1.1 About software version

This is software version for **MT1-U06** product; please operate after read the upgrade guideline carefully.

(1) Software requirement

- a. Before upgrade, please guarantee the version you use is Huawei official version, or else it may upgrade failed or cause unknown problem.
- b. Don't try to upgrade software of other country or customization, or else it may upgrade failed or cause unknown problem.

(2) Hardware requirement

This the software suits to **MT1-U06** product, it can only use for **MT1-U06** product, and it may cause can't power on if you use this software on other product.

Any problem cause by user doesn't follow the instructions, Huawei will not provide in warranty service.

1.2 About Upgrade Preparation

Back up your personal data before upgrade, the upgrade process will wipe all user data.

To make sure that the power of the battery is enough to run the upgrade process. Maybe you can connect the handset with the charger or the USB data cable to provide power.

2 Version introduction

2.1 The following versions can be upgraded.

Versions can be upgraded
SOFTWARE_VER_LIST.mbn (MT1-U06 not startup this function)

2.2 Upgrade prerequisite

The **MT1-U06** handset software should be updated with the MICRO SD card.

2.3 Upgrade files

	File Name
Main package	dload\UPDATE.APP
Update tools	SD card

3 Upgrade preparation

3.1 Check current upgrade environment

Make sure that the MICRO SD card is available and can be read and write.

3.2 Get and check the software package

1. According to the chapter 2.3, check the software package date and the file size.
2. Copy the dload folder to SD card, the directory is /dload/UPDATE.APP

4 Upgrade introduction

There are two methods to upgrade: normal upgrade and force upgrade.

Normal upgrade needs to start the handset and enter the Setting module. Force upgrade is often used when the handset can't boot up or can't enter the idle screen.

5 Upgrade operations

Notices:

1. Upgrade will erase the user data, please backup your data before upgrade.
2. Ensure that the power is at least 15% left when upgrading.

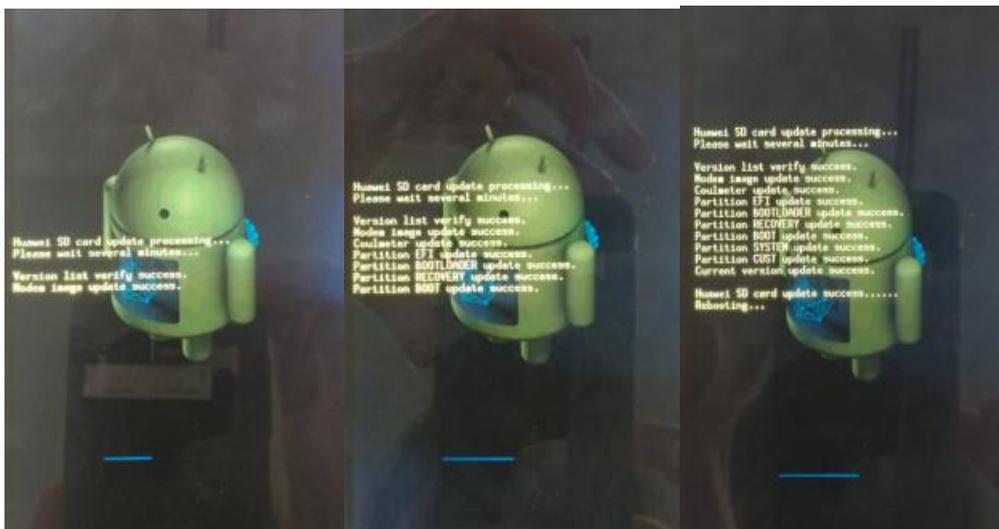

5.1 Force upgrade

Step 1. A MICRO SD card of 2GB or more should be available. The MICRO SD card made by Sandisk, Kingstone, or Kingmax is recommended.

Step 2. Format the MICRO SD card (This operation is optional).

Step 3. Make sure that there is an UPDATE.APP under the dload. Copy the Main package of dload in PC to dload of SD card.

Step 4. Make sure your handset is power off. Insert the MICRO SD card into the handset. Pressing the **VOLUME UP** key and **VOLUME DOWN** key, then press the **POWER** key to power on the phone, and **VOLUME UP** key and **VOLUME DOWN** key should be pressed more than 3 seconds, then enter the Software Upgrade Mode.

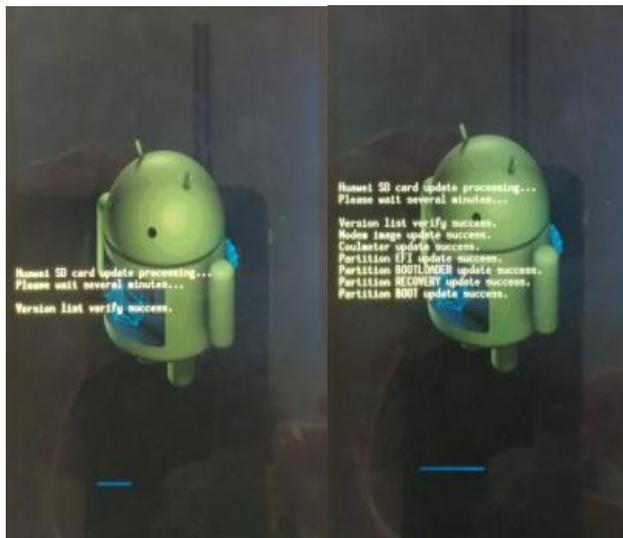

5.2 Normal upgrade

Step 1. A MICRO SD card of 2GB or more should be available. The MICRO SD card made by Sandisk, Kingstone, or Kingmax is recommended.

Step 2. Format the MICRO SD card (This operation is optional).

Step 3. Make sure that there is an UPDATE.APP under the dload. Copy the Main package of dload in PC to dload of SD card.

Step 4. Insert the MICRO SD card into the handset and power on. After entering the home screen, press menu key to choose **Settings->Storage->Software Upgrade->SD card Upgrade->Confirm->Upgrade** to start the upgrade. Reference to the following pictures.

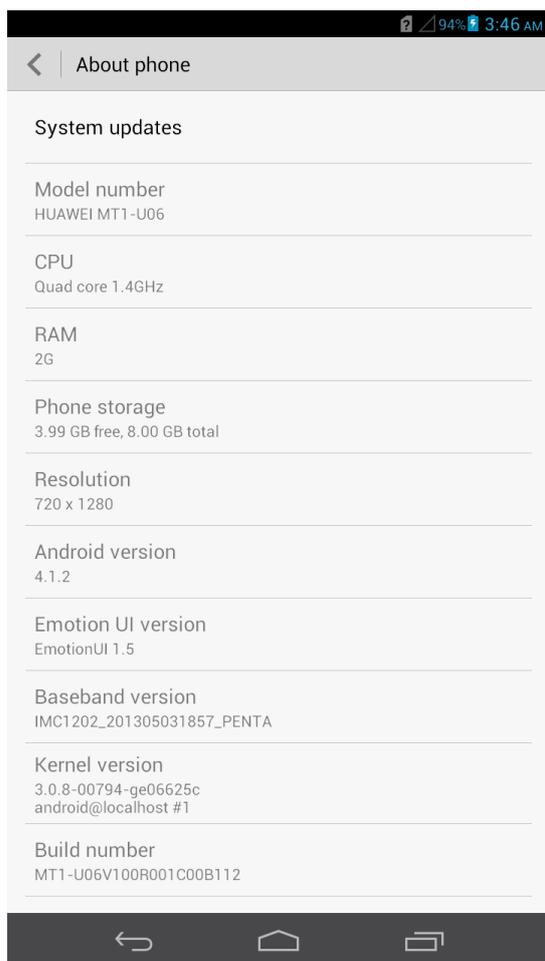

6 Upgrade validate

6.1 Check the version

By Settings ->About phone->Build number, to check the version. Just like the picture below:

Build number: **MT1-U06V100R001C00B112**

Note: RAM SIZE please confirmed with the hardware

6.2 Precaution

To ensure adequate battery, it is recommended to connect the USB cable during the upgrade process.

User data will be wiped out during the upgrade process, so it is recommended to make a backup for important content before upgrading.

6.3 Upgrade failed checklist

If you it still can't solve the problem, Please send your phone to nearest service center.
