6. FAQ

■ Q: Proxy service setting and checking methods

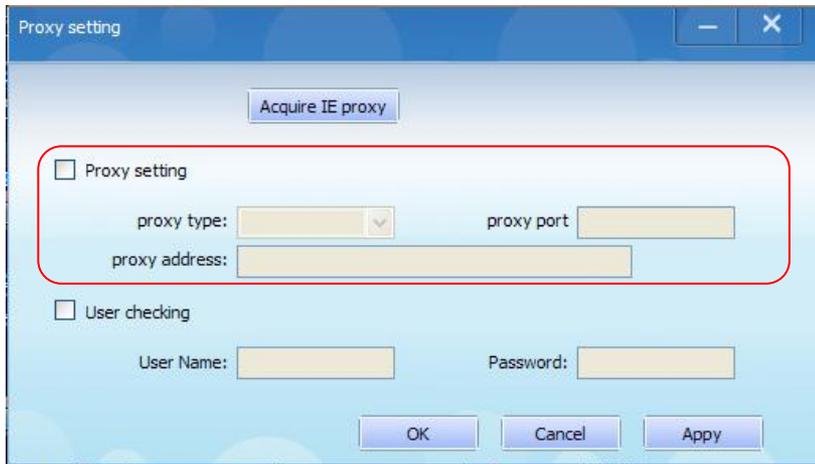

➔ A : a) Right-click the system ash-tray icon in taskbar, then right-click “Proxy setting”, the interface is as following:

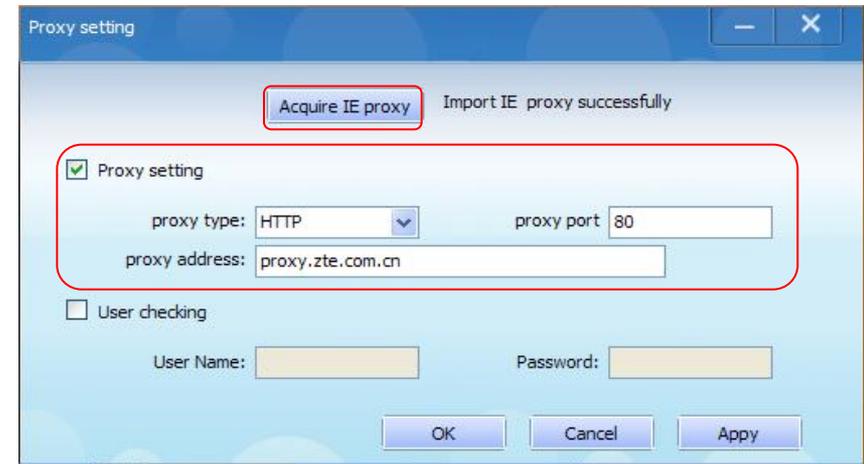

☹ Detection network failure

b) System prompt the interface of “Proxy settings”, if the user doesn’t use proxy to obtain the network service, the content in “Proxy setting” page can be ignored.

c) If PC acquired network service through proxy server, the user click “Acquire IE proxy” button then will be automatically set the proxy.

☺ Non- Proxy setting

☺ Have Proxy setting

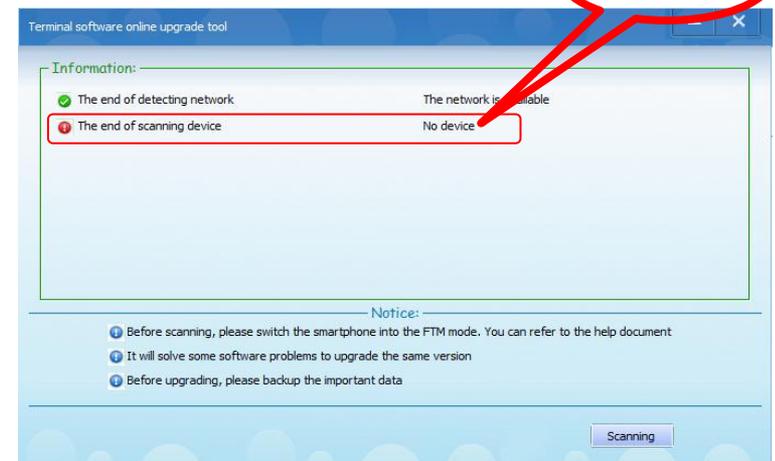

- Q: How to Enter Smart phone FTM Model?

A: The way for Smart phone to enter into FTM mode is same with the way of ATLAS W, you just need to find the Power key and Volume down key on mobile phone , hold the Power key and press volume down key as described on page 18, then the mobile phone can enter into FTM mode.(Such as: Medion Smartphone Life P4310, ZTE Skate)

■ Q: When the driver has installed success, the frequently reasons of can not get device information or abnormal information.

■ A:

1. Please make sure mobile phone switch to FTM mode(Page18)
2. Connect the terminal device though USB data cable connector which is supported by ZTE models.
3. Computer have install more others manufacturer drivers , please remove it and try install again.
4. Device hardware problem. Please immediately contact ZTE after-sales service center to get solved.

- Q: For the same type of mobile phone, could I upgrade the software version from country A or district A to the one of country B or district

- A:

No. you couldn't.

As the same one type of mobile phone has different version series in different country or district, so you can only upgrade your mobile phone within the original version series. For example, If you bought your mobile phone in China, you can just upgrade your mobile phone to the highest version of Chinese version series, but cannot upgrade to the highest version of American version series.
