## **Software Release: Beta Software Release Note for Huawei Ascend Smartphone**

**Content:**

### **Applicable models and versions:**

MT7-L09 : MT7-L09 V100R001C00B137

MT7-TL10 : MT7-TL10 V100R001C00B120SP04

P7-L10 : P7-L10V100R001C900B803

H60-L04 : H60-L04 V100R001C00B380

*This update is applicable to the above models & version only.*

### **About the update**

Before updating your phone, **please read carefully on the *Software Update Guideline* provided with the update package and back up your personal data** to prevent any possible data loss.

1. This update will update your system to Android 5.1. If some third-party apps are incompatible with Android 5.1, update those apps to latest versions in Google Play. After the update, home screen layout may be rearranged slightly.
2. OTA update: Update your phone from EMUI 3.0 to this beta version.
3. If your phone system has been rooted, you may not be able to perform an OTA update. In this case, download the full update package to update your phone.
4. **Full package update:** Update your phone from EMUI 3.0 to this beta version by downloading and installing the full update package.
5. **SD card update:** Save the update package into the **dload** folder of your SD card. On your phone, go to **Settings > Update > Menu > Local update**.
6. **Version downgrade:** You will not be able to directly downgrade to EMUI 3.0. If to downgrade, please contact one of the Huawei authorized service centers in your country or region and obtain the Downgrade Software Pack.
