

## Ainol Novo 7 Firmware Update Guide

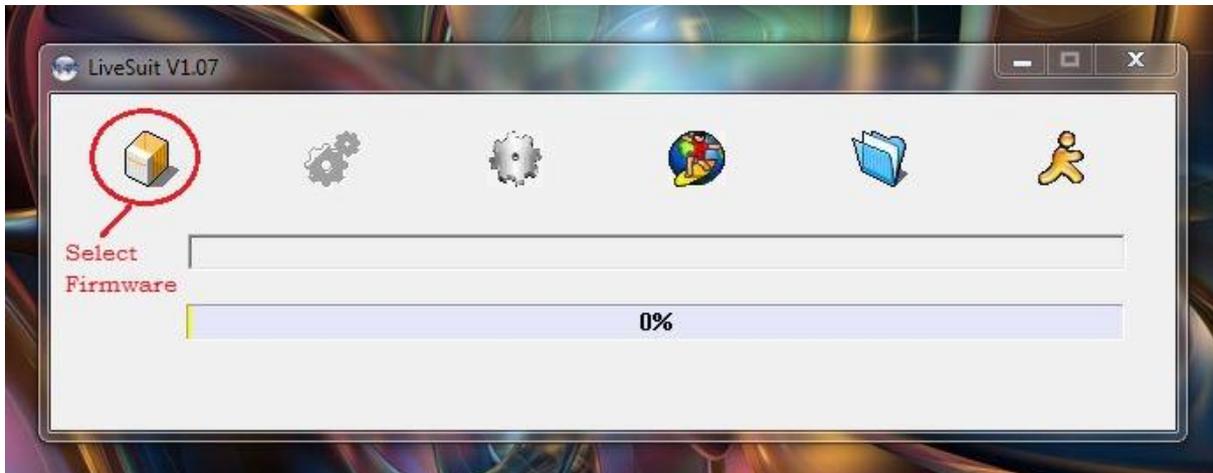

- ✓ Download the latest [Novo 7 Firmware](#) & [LiveSuit PC Application](#) from [GadgetFreakz.co.uk](http://GadgetFreakz.co.uk)
- ✓ Make sure the device is fully charged.
- ✓ Backup ALL data as the firmware update will format the device.
- ✓ Extract firmware and LiveSuit .rar files to a folder named Novo7 on your desktop.
- ✓ Install the LiveSuit application.

➤ **Follow the steps below to carry out the Novo 7 firmware update procedure...**

### Launch the LiveSuit application

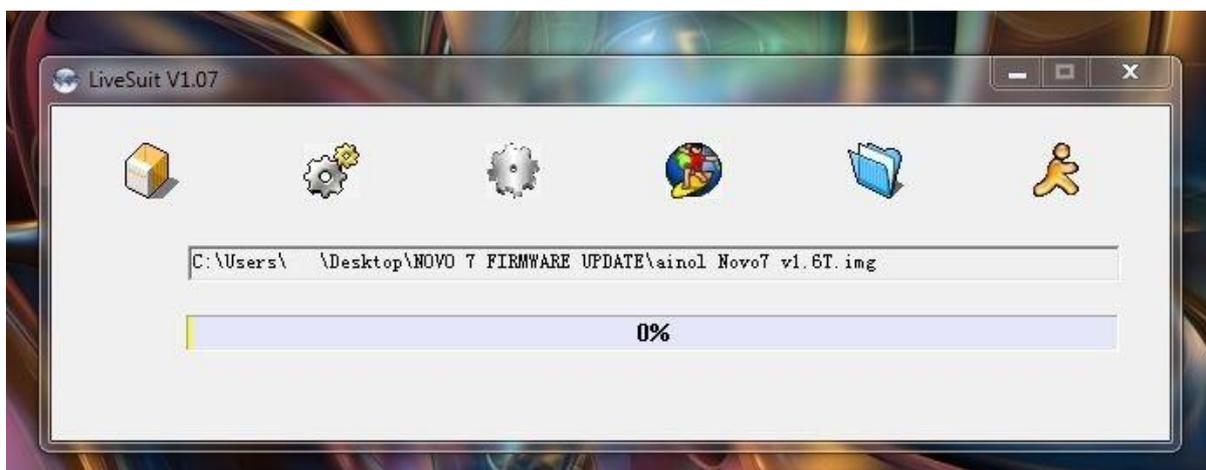

### Browse firmware file by clicking the icon below

### Select the downloaded and extracted Novo 7 firmware .img file

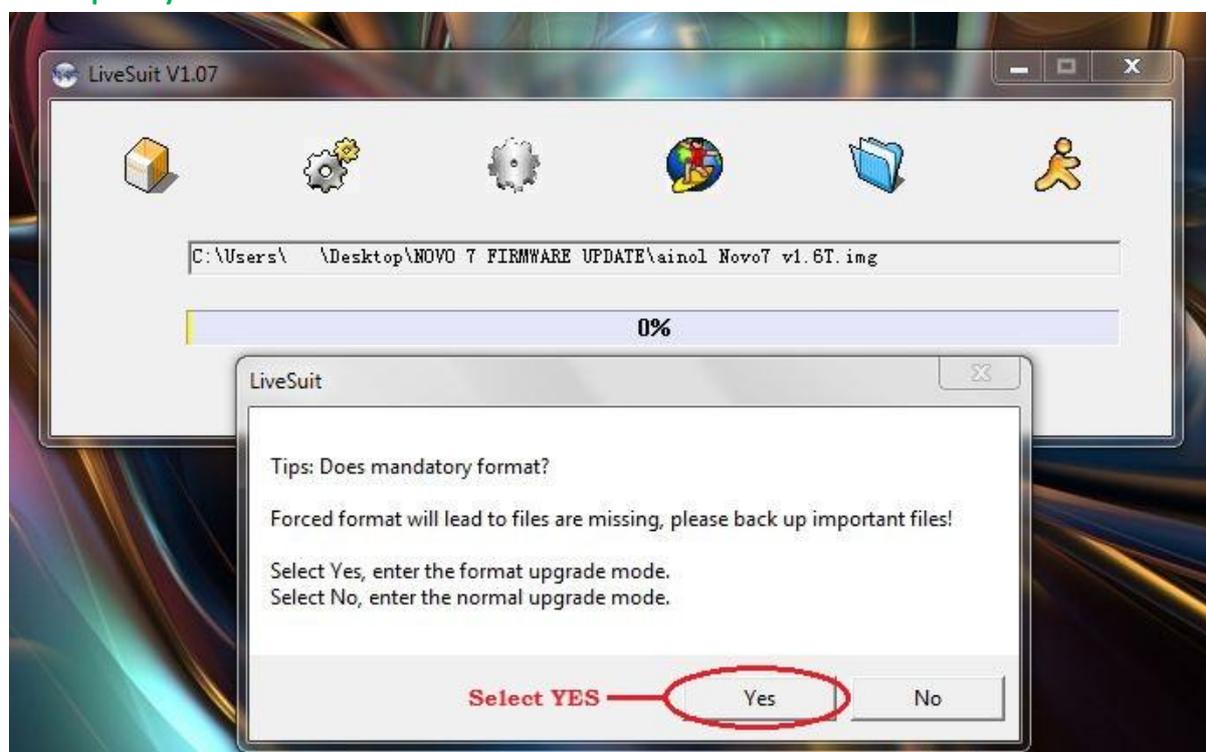

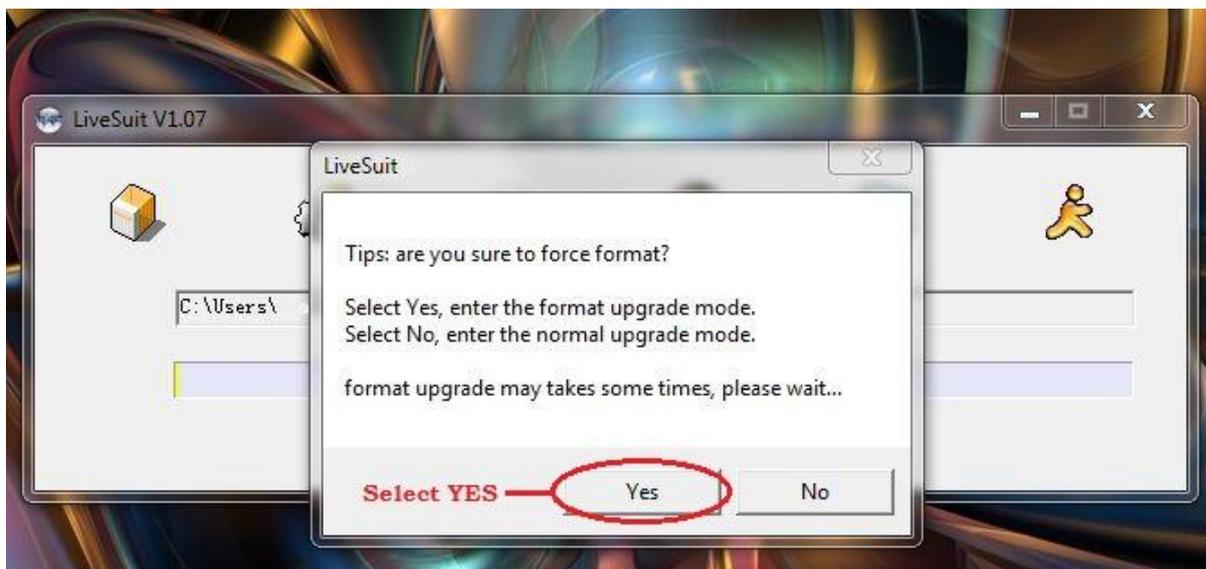

Please follow the following steps carefully to activate the firmware upgrade process

- 1) Confirm the Novo 7 is switched off, if not switch it off now.
- 2) Press and hold the **VOL +** button
- 3) Connect USB cable from computer to Novo 7  
Please note if using windows XP you may require android usb drivers for hardware installation, we have included these within the LiveSuitPack.
- 4) Press the power button 5-6 times quickly whilst keeping the VOL + button pressed

When the steps above have been carried out correctly, the following window below will be displayed...  
At this point you **MUST** release both buttons or the device will switch off.

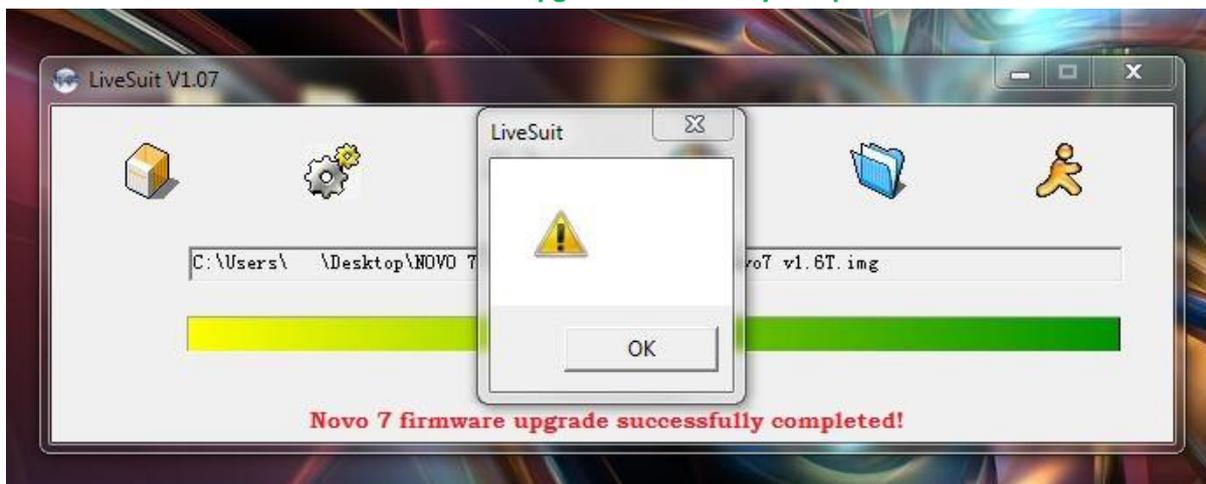

Firmware upgrade process successfully started, please wait 2-3mins to complete

Novo 7 firmware upgrade successfully completed

Once the Novo 7 firmware update is complete the language will be set to Chinese as default, to change the language and also a few other options we suggest, see below...

### ➤ **Language Change**

Go to settings & select language menu with the following icon [A]  
Select your desired language & **reboot to take full affect**

### ➤ **Wi-Fi Sleep Policy**

Go to: settings / wireless & networks / wifi settings  
Press the Menu button & select advanced  
Select wifi sleep policy and change to never

### ➤ **Display Sleep**

Go to: settings / display / screen timeout  
Change to desired time – we suggest 10mins
