*Google apps. Strictly speaking, these apps are not necessarily needed for the phone to work, however, these apps are tightly integrated with Google branded Android, and removing them could cause stability issues.				
**TtsService.apk. This app is safe to remove, however, it is needed for speech for Google Navigation. Google Nav will work fine without it – just no				
Please read the article titled “How To Remove Stock Android Apps” for instructions on how to do exactly that, remove stock Android apps.
